

Awakening the Queen of the Silver Camps

Blackrock's flagship Tonopah West project consolidates the western half of the famed Tonopah Silver District within the Walker Lane trend of Nevada. Known as the Queen of the Silver Camps, the Tonopah Silver District produced over 174 million ounces of silver and 1.8 million ounces of gold from approximately 7.5 million tonnes of material, making it one of the highest-grade silver primary districts in North America. As the first group to target the historic workings on the property since production shut down nearly 100 years ago due to low metals prices at the onset of the Great Depression, Blackrock has brought new life to the district, completing in excess of 150,000 metres of exploration drilling since 2020 and establishing the project as one of the highest-grade undeveloped silver projects globally, and the highest-grade in the nation. The project hosts an inferred mineral resource estimate of 6.12 million tonnes at a block diluted grade of 242.6 grams per tonne (g/t) silver (Ag) and 2.9g/t gold (Au) for a total inferred mineral resource of 47,738,000 ounces Ag and 570,000 ounces Au, or 508.5 g/t silver equivalent (AgEq) for 100.04 million oz AgEq.

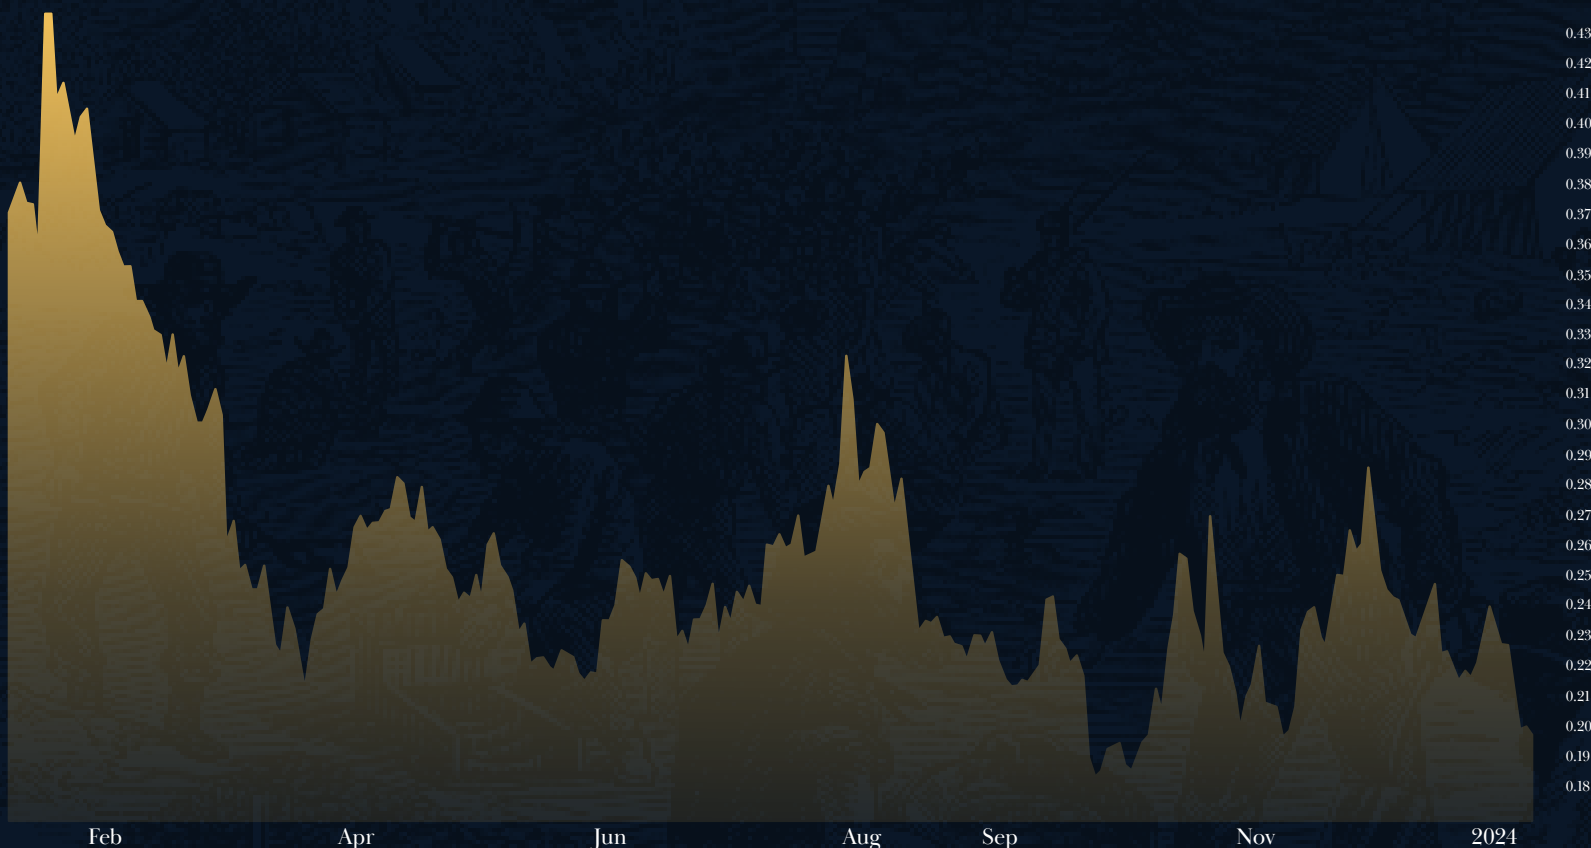

Nevada

Investment Highlights

- One of the largest historic silver districts in North America, producing 174 Mozs Ag & 1.8 Mozs Au from 7.5m tonnes
- Situated on patented claims, project represents the western extension of the famed Tonopah silver district with control over more than half of the second-largest silver district (behind only the Comstock Lode) in Nevada
- Updated 2023 mineral resource estimate outlines 6.12M tonnes grading 508.5 g/t AgEq for 100.04M ounces AgEq
- The highest-grade undeveloped silver project of size in the world
- The drill defined system has been tracked across 1.8 miles and remains open to the south, northwest, at depth.
- Substantial low-hanging resource expansion potential remains with further infill drilling required that will establish continuity between the systems, turning 3 deposit areas into 1
- Discovery costs of only \$0.29/ounce AgEq*
